---

Sorry, I didn't realize you were on vacation. Hope you have a nice week. We'll try to behave while you're gone. Thanks for your help with this. I'm not sure what she was looking at had anything to do with powder sheets (ie: mass spec maintenance logs, etc) but we can talk about it when you get back. Thanks again. -Dan

Hi dan

Sorry that this is continuing to cause problems. She is working on some revised powder sheets and may have needed access for that. I will address with her when I return from vacation.

Julie

Good morning Julie. Can we ask if Annie was in the drug lab last week doing something for you or if she was in here on her own? I think it was a giant step forward for the morale of the lab to move her over to your side but then when she was in the lab at the end of last week going through different items, it was like taking 2 steps backwards and everyone was upset all over again. If possible, we'd prefer if she wasn't traipsing through the lab and disrupting everyone. If she needs some information that's in the drug lab, we'd be happy to provide it to her and bring it over to your office. I'd be happy to discuss this issue with you if you'd like and come to a consensus of what's best for the lab. (don't worry, I won't ask you to divulge anything that you shouldn't or can't) Thanks.

-Dan
